

e-Learning for Military Retirees

SkillSoft (formerly SmartForce) is pleased to extend its e-Learning system to military retirees of all branches.

You will have Internet access to the comprehensive SmartForce e-Learning site that includes about 1,500 courses (over 70 IT certification exams, 40 full certifications, exceeding 6,000 hours of content) and all course extensions, such as individual mentoring, personalization, online labs, collaboration, assessment tests and more. You will be able to take the courses from anywhere at anytime, 24x7, live over the web or download the programs for offline use, as necessary.

A course catalog is available upon request to help guide you. Once on the e-Learning site, you will have full learning path control and individual personalization to track yourself through the training according to your own specific individual requirements.

You will need Internet access to use this system - a 56K modem or faster connection is recommended.

Your annual rate is only \$400 per year for unlimited personal use of the system - significantly less than the cost for attending any two days of classes for equivalent content. The commercial fee for MCSE now runs from \$7,000 to \$10,000. Cisco classes average over \$300 per day.

If you wish to pay by credit card, I suggest you print this page, write your credit card number and expiration date below, sign this page and fax it to me at the number below.

Also, please fax a copy of your DD-214 as proof of retirement and program eligibility.

Please let me know if you have any questions. We look forward to serving you.

Sincerely,

Willard J. Scott
